Business Background

Skin Science from Nature

A great balance of natural ingredients and traditional fermentation with the modern nano-technology.

THECOSMEDIUM has engaged in a long-time research to avoid the factors threatening the human's life and disturbing the ecosystem and as a result, we finally successfully developed a new technology in application of nanoparticles from high organic molecular compounds, using the "special enzyme method" therefore, we could launch eco-friendly and highly functional cosmetics in convergence of the traditional fermentation and the advanced nano-technology for natural ingredients.

Business Objective

1. Organic and organic cosmetics research and development
 - 1) Production of natural and organic cosmetics.
 - 2) Manufacturing function (whitening, wrinkling, etc.)
3. Organic Farming (Chungbuk) Organic Farming (Jecheon) : Raw material costs (raw material) costs
